

Procurement and delivery of capital projects

If you are planning a refurbishment or building project but don't have the time or skills required to manage it, then the TDA can help.

From the renovation of a staff room to the installation of disabled facilities, TDA's comprehensive project management service has a proven track record of delivering projects to time and budget. The TDA is sensitive to the need to work around school holidays as well as effectively and considerately working around a school that is open too.

The TDA can manage everything from producing project designs, submitting planning applications, selecting contractors and driving the project through to completion. For more information on project delivery you can contact the TDA Schools Team or TDA Property Services.
